Live Maze Evaluation Report

MIRepNet results for Subjects 10 and 6

All four live MIRepNet maze tests finished successfully. Using the first model decision at each planned corner, Subject 10 achieved 82.5% accuracy (66/80), Subject 6 achieved 96.3% (77/80), and combined accuracy was 89.4% (143/160).

Results Overview

Session	Maze seed	Duration	Correct	Accuracy	Wrong corners	Recovery moves
S10 T1	M1 S11	8:58	32/40	**80.0%**	20, 22, 29, 31, 33, 34, 39, 40	20
S10 T2	M2 S12	7:47	34/40	**85.0%**	16, 17, 33, 35, 38, 39	18
S6 T1	M3 S13	6:38	39/40	**97.5%**	12	2
S6 T2	M4 S14	6:10	38/40	**95.0%**	28, 39	4

Scoring and Video Record

Scoring Each planned corner contributes one result. Extra physical turns used to recover from an incorrect decision are reported as recovery moves and are excluded from accuracy.

Videos The face clips are the original camera recordings. The maze clips are live style replays reconstructed from the recorded decisions and timing after the original maze recordings were corrupted. They reproduce the path, model choices, turn numbers and on screen status messages, but they are not the original captured maze frames.

Subject Comparison

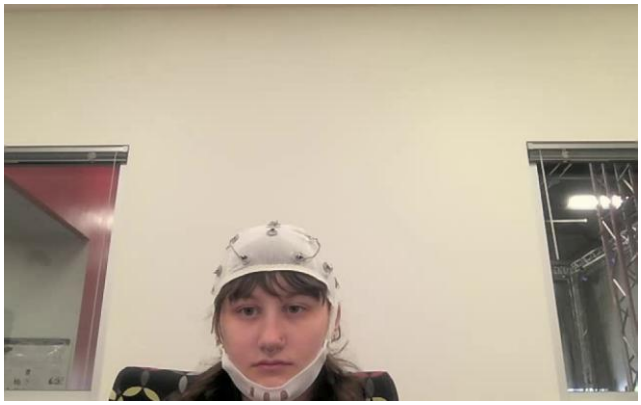

Subject 6 recorded 11 more correct corners than Subject 10 across the same number of scored corners (77 versus 66). The sessions used different model checkpoints and different mazes, so this descriptive comparison does not separate participant, checkpoint or maze effects.

Subject 10

Across two completed mazes, Subject 10 scored 66/80 (82.5%) using the pretrained seven subject checkpoint mirepnet__7subjects_28runs_22b10fee.pt.

Test 1 Maze 1 Seed 11

32/40 correct | 80.0% accuracy | wrong corners 20, 22, 29, 31, 33, 34, 39, 40 | 20 recovery moves | session 8:58

Subject 6

Across two completed mazes, Subject 6 scored 77/80 (96.3%) using the subject session fine tuned checkpoint mirepnet__finetuned_20260926_165237.pt.

Test 1 Maze 3 Seed 13

39/40 correct | 97.5% accuracy | wrong corners 12 | 2 recovery moves | session 6:38
